

Trackman® paver track meets the toughest application requirements in the world. Yours.

That's because we engineer paver track that measures up to the exact demands of the world's leading equipment manufacturers, as well as your expectations.

Trackman®

*Aftermarket Paver Track
for Volvo, Blaw-Knox,
Ingersoll Rand, VÖGELE,
Roadtec, Cedarapids and CAT*

Constructed for Longer Life

Increased wheel path gauge (+33%) for enhanced wheel path durability.

Patented cable construction assures optimal rubber penetration

Advanced wire-ply design helps eliminate wire migration.

Increased wire-ply end count increases lateral track stiffness, guide lug durability and improves track retention.

Built Better to Perform

Patented TZ track design is recognized as the industry standard, delivering the smoothest ride and improved paving quality.

Continuous, full thickness edge substantially reduces edge damage, the leading cause of premature track removal.

Chamfered edges minimize surface disruptions when turning on roadbeds and fresh asphalt.
